BACKACHE

605. Paulett, J. D.

Low back pain. Lancet. Aug. 23, 1947. 253:6469:272-276.

A report of an intensive study made of 25 patients in a military general hospital in Italy in 1944.

BIRTH

606. Faber, Harold K.

Cerebral damage in infants and in children; some observations on its causes and the possibilities of its prevention. Am. J. of Diseases of Children. July, 1947. 74:1:1-9.

A study of 99 infants, all with demonstrated cerebral atrophy, presumably of extrinsic rather than genetic origin. Mental deficiency was present in 74%; spastic paralysis in 43%, and the convulsive state in 48% of the patients. Study was prompted by the "idea that pediatricians had been thinking etiologically too much in terms of intracranial hemorrhage and too little in terms of anoxia."

Issued by the Research and Legislative Service, National Society for Crippled Children and Adults, Inc.

Miss Kathleen Allen was director of the study.

BULLETIN ON CURRENT LITERATURE

The publications listed in this issue have been received by the library of the National Society for Crippled Children and Adults and are available for loan. The library does not stock copies for sale. Prices are listed so that orders may be addressed directly to the publishers.

Because the library frequently has only one copy of an item, and because of the great number of requests, it is suggested that the resources of local libraries be investigated first. The library is maintained by the National Society for the use of its staff for the state and local member societies and for others whose local resources are so limited as to make the material otherwise unavailable.

The National Society attempts to maintain as complete a collection as possible on all subjects of interest to workers with the handicapped. Besides lending specific books, pamphlets, or magazine articles, the library will assemble and send materials on any specific subject. Loan material is sent to the borrower who pays shipping charges.

The National Society for Crippled Children and Adults is a nationwide organization with headquarters in Chicago and more than 2,000 member state and local societies for the crippled and handicapped throughout the country. Its many projects and services are directed and supervised by professionally trained specialists. The Society provides services in health, welfare, education, recreation, and employment to all types of handicapped persons. All services of the Society are established and carried out in a manner to supplement and extend and not to duplicate or compete with the services of any other agency, public or private, national, state, or local. The National Society is supported by the annual sale of Easter Seals.
